

Automatic Nut-Tack Welding Machine

Description

- It is a fully automated structural nuts tack welding Machine.
- Servo Controlled indexing Plate enables mounting of multiple workpieces, thus reducing the cycle time.
- The machine features the automatic detection of missing components.

Features

- Servo Controlled Indexing Plate for mounting multiple workpieces.
- Loading & Unloading of W/P is manual.
- Pneumatically operated Torch Head motion.
- Microslide adjustment for torch setting.
- Torch gun with attachment – 2nos

Cont..

- Proper ventilation for welding smoke.
- On time counter display.
- It includes timer for setting weld time
- Automatic detection of missing components.
- PLC Controlled operations.

Thank You
